

ABSTRACT OF THE DISCLOSURE

A liquid crystal display device includes a first substrate having a first region and a second region, wherein the second region surrounds the first region, a plurality of patterned spacers over the first substrate in the first region, a plurality of supporting patterns spaced apart from each other over the first substrate in the second region, a seal pattern in the second region including the plurality of supporting patterns, a second substrate spaced apart from and attached to the first substrate by the seal pattern, and a liquid crystal layer between the first and second substrates.
